

Press Information for Immediate Release

Date Line: Dec. 06/22

HHI Introduces RADIAL MOUNT 6 PISTON BRAKE CALIPERS

Now available from Hawg Halters Inc is our New Radial Mount 6 Piston Dual and Single Caliper Kits.

The HHI Direct Bolt-On Engineered Calipers install to the popular 108 mm mounting brackets used by leading custom suppliers of HD Performance Lower Leg Sets & Custom Front Ends.

These Precision CNC-machined 6061 billet aluminum calipers are proudly made in our Georgia, USA facility.

HHI Radial Calipers feature differential bore technology for optimum performance and are designed with Dual EPDM Copolymer Seals and Stainless-Steel Pistons.

The brake calipers are shipped complete with Chrome Grade 8 Hardware and fittings. The brakes have a quick-change design for easy pad maintenance and feature dual, hidden bleeders for easy bleeding. Installation hardware for both an 11.8- & 13-inch brake rotor is included.

The HHI Radial Brake Caliper fits most late model, HD Bikes.

HHI has also just released a New 13-inch brake rotor upgrade kit with adapters for both Radial & Axial Caliper applications. These adapters to stock and most performance leg sets fit a 13-inch rotor to a wide range of HD Bikes.

HHI Radial calipers are delivered in Black, Inca Gold, Machine & Show Chrome.
